ETID and Intransit Control System (ICS)

- The ICS is a DoD tracking system for property designated for disposal by DRMS.
- ETID was designed to improve compliance with the ICS requirements.
 - * Property that meets ICS criteria is automatically entered for the generator
- Approved ETIDs that are never turned in can cause ICS mismatches
- Batching property subject to ICS tracking will cause mismatches

Follow up on approved ETIDs that are never received

Process Receipt Refusal for property subject to ICS tracking that will not be turned in
